

## STIPULATION

In addition to providing electric service to a significant portion of the load in the ComEd service territory and a growing percentage of the load in the Ameren service territories, many Alternative Retail Electric Suppliers (ARES) also provide demand response and energy efficiency type products and services to their customers. Given these considerations, we believe that ARES' inclusion in a collaborative stakeholder process such as contemplated in Illinois Commerce Commission Docket Nos. 07-0539, 07-0540, and/or 07-0541 can only enhance the dialogue.

WHEREAS, the undersigned do not oppose the inclusion of a representative of the ARES community in the Stakeholder Advisory Process as advocated in the direct testimony of Henry Henderson on behalf of the Natural Resources Defense Council, or any similar collaborative process resulting from these proceedings
